

# Parking Management Parking Guidance System

ENTEf offers integrated solutions for Parking Management System.

The Parking Guidance, is fully compatible with the Parking Management System.

Products passed the CE certification and ROHS certification.

ENTEf promotes the quality products with best service and competitive price.

Parking Guidance System can effectively solve the problems of traditional parking lots. It uses ultrasonic detector to test the parking status of each parking space, guidance screen and parking lights to guide the customers driving to the vacant parking space. It can reduce traffic congestion while quickening the vehicle turnover, which will help to raise the parking usage and income.

- The peak hour parking space occupancy will be increased by 8%
- Parking space utilization will be increased by 3%
- Carbon dioxide emissions will be decreased by 56%
- The operation cost will be decreased by 1-3%

PMG-20LD NEW

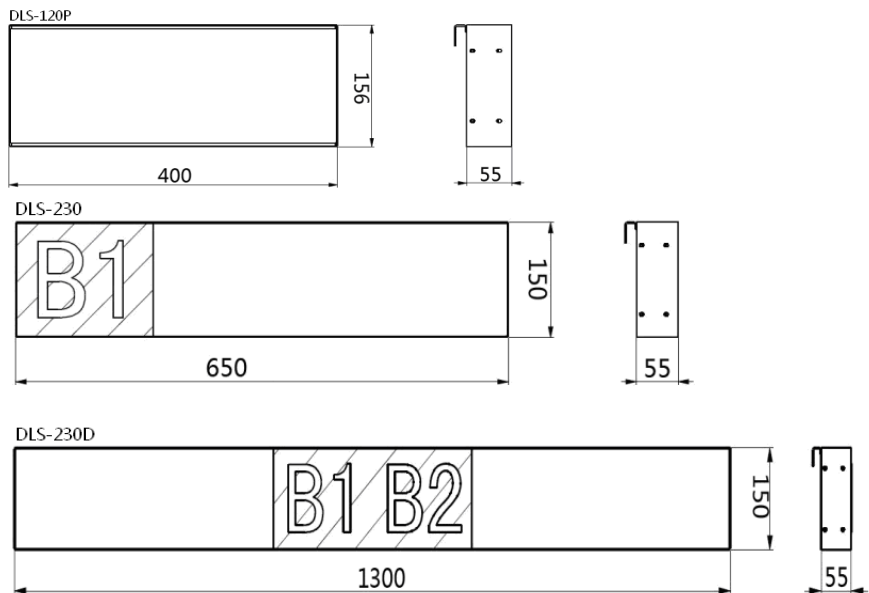

PMG-20L NEW

### Technical Specification

Model	PMG-20D NEW	PMG-20LD NEW
Input Voltage		DC 9~24V or POE
Power Rating	0.5W	2W
Working Temp		-20 ~ 75C
Weight	135g	150g
Measure Range		1.8-4.0 m
Measure Angle		~70°
Communication Way		Ethernet / WiFi

## Parking Information Label

## Technical Specification

Model	DLS-120P	DLS-230	DLS-230D
Input Voltage	AC220V, 25W	AC220V, 25W	AC220V, 25W
Working Temp		-30 ~ 70C	
Weight	2.7Kg	4.2Kg	8Kg
Communication Way		RS485 ,TCP/IP
